Viniferamine® Renewal Environment for Mature Skin

Viniferamine® creates a supportive renewal environment for mature skin by combining aloe-derived hydration, linoleic-rich botanical lipids, grape polyphenol antioxidants, and stable vitamin C at a mildly acidic pH of approximately 5.5. Together, these ingredients help reinforce surface hydration, support the skin's lipid barrier, and improve the visible texture and overall appearance of mature skin. Illustration is conceptual and does not represent the precise depth of ingredient penetration.
